DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/15/06 has been entered.

REJECTIONS WITHDRAWN

2. The 112 2nd paragraph rejections set forth in the final rejection of 11/14/05, pages 3-4, paragraphs 8-11.

REJECTIONS REPEATED

3. The 102(b) rejections set forth in the final rejection of 11/14/05, pages 4-5, paragraphs 12-13 are maintained for the reasons of record.

NEW REJECTIONS

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/664,491

Art Unit: 1772

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 37-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaschel et al. (US 5885707).

Kaschel discloses wherein said metallized layer is metal foil (column 6, lines 14-24) and wherein said thermoplastic polymeric material of the first layer comprises ethylene acrylic acid copolymer (Table 2 and column 4, lines 17-20).

ANSWERS TO APPLICANT'S ARGUMENTS

6. Applicant's arguments filed 8/15/06 have been carefully considered but are deemed unpersuasive.

Applicant has argued that the citation of Kaschel (column 2, lines 28-34) with regard to the melt index of the polyethylene sealing layer is not in reference to their own invention but rather to an invention disclosed in EP 0572034 and that melt index of the polyethylene sealing layer of Kaschel is from 0.5 to 10 g/10 min (column 4, lines 45-49). However, it is clearly stated in the MPEP that a reference is for all it discloses not just the preferred embodiments (MPEP 2123). Furthermore, applicant's claim recites that the melt index is above **about** 10. The term "about" includes numbers below and above 10. Thus, a melt index of 10 g/10 min would read on applicant's claim because the phrase "above **about** 10" includes values below and above 10.

Application/Control Number: 10/664,491

Art Unit: 1772

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Miggins whose telephone number is 571-272-1494. The examiner can normally be reached on 1:00-10:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
